

Shacklewell Code Club newsletter // October 2017

This term we've been following Code Club project sheets to learn how to move objects and add interactivity in Scratch. You can log into your Scratch accounts from any desktop computer or laptop by visiting <https://scratch.mit.edu/> – remember that your username is **sw-** followed by your first name, for example **sw-dan**

You'll hopefully know your password but if you forget it ask your parent or guardian to email **dan@shacklewell.club** and I'll reset it. If you want to explore more Code Club projects they're all available at <https://codeclubprojects.org/> - they have recently added some advanced Scratch projects, so if you already know Scratch well you should find something interesting to challenge you.

Code Club Competition

Have a look at our blog to find out about an exciting **Code Club competition** to design a festive greeting for Code Clubs around the world! <https://shacklewell.club/>

Yes Shacklewell Code Club has a blog!

Yes we have a blog! You can see it by typing this in your browser's address bar <https://shacklewell.club/> If you'd like to write something for the blog that would be fantastic. It doesn't need to be long, it could just be a couple of lines about something interesting you've learned about, but please keep the posts related to Code Club, for example coding, science, technology, inventions... You get the idea.

You can read detailed instructions on how to contribute here <https://shacklewell.club/blogging/> - remember, you can always start writing something and then save it to finish later. Give it a try!

The only other information you'll need is your blogging password which is **shack77**

Hour of Code, Trinket etc.

The handy thing about us having a website is that it gives us somewhere to put all the useful information we've gathered for our club. Go to <https://shacklewell.club/how-to/> for guides on how to log into Hour of Code, Trinket, Scratch etc.

We cannot put your passwords on there unfortunately but most of the time your password will be **shack77**

Have a great half-term break and **keep coding!**

Dan, Mirela & Edil
